

The Center for Alzheimer's Care, Imaging & Research: Care Without Compromise

- We provide the highest standards of dementia care following professional guidelines.
- We utilize cutting-edge, proven technology and diagnostic methods.
- Most national insurance providers cover the costs of dementia care. However, many insurance companies in the Intermountain West have not yet reimbursed testing that is a standard part of dementia evaluations in other parts of the United States.
- Our Appeals Advocate helps patients get the care they deserve by standing behind the importance of definitive cognitive assessments and guiding them through the insurance appeal process.
- We work with insurance companies to get patients coverage for needed testing.
- With our help, several insurance companies are reconsidering their current policies.
- Final outcome: Insurance companies have agreed to pay in 80% of submitted appeals.
